

# MAMBA GOLD CORP.

TECHNOLOGY PROVIDER  
PLUS CHEMICAL-FREE  
MOBILE PROCESSING  
PLANTS IN ZAMBIA

## *Corporate Vision*

*To improve the current value proposition for the artisanal mining industry in Africa.  
Mamba Gold Corp. will work with the miners to SIGNIFICANTLY IMPROVE THEIR  
GOLD RECOVERY while eliminating dangerous chemicals during processing*

# THE BUSINESS

Mamba Gold Corp. (“Mamba”) assists artisanal miners in the extraction gold and other precious metals in Zambia. Mamba, working in partnership with local artisanal mine owners, will bring advanced technology and mobile gold processing services to Zambia to increase gold recovery

It is discouraged by the government for Artisanal miners to do any small-scale mining deeper than 20 meters for safety reasons. There are very rich deposits of high-grade hard rock gold bearing veins and alluvial gold near surface that make it easy for miners to extract with the assistance of Mamba’s technology which identifies the precise locations to dig.

# BUSINESS MODEL

- Mamba scans the property and directs the miners where to dig. For the scanning service, Mamba is paid a percentage of any precious metal extracted from the site. Mamba scans the ore being extracted to ensure that miners work with gold bearing ore.
- If the miners opt to use further services provided by Mamba such as processing plants, Mamba is paid additionally for added services.
- Mamba will have an agreement for first right to purchase the gold produced at the buying prices at the mine.

**Mamba melts the gold into Dore bars to be sold to Dubai gold refineries.**

\*\*\*High grade veins are being excavated which enables Mamba to process good quality ore.

# REVENUE STREAMS

- **Provide Scanning services to identifying gold bearing locations for miners to dig**
- **Scanning the ore that miners are extracting to ensure it is gold bearing**
- **Revenue share of gold production and buying gold at the mine site**
- **Providing chemical free processing services**
- **Providing heavy equipment for easy access for extraction of the ore**
- **Processing gold to dore bars**

## SCANNING THE PROPERTIES

Mamba scans the properties to show the miners where the gold and other precious metals are located with leading edge technologies. This enables the miners to save time and energy. With our employees on site, the miners are able to follow veins, and dig in locations near surface. Presently, digging is often done blindly or where there is an outcrop.

## PROCESSING THE ORE

Mamba will bring mobile processing plants into mining locations with high ore production, whereby the local Chief and miner owners agree.

Mamba scans the ore as it is being extracted to ensure there is gold and has rock sorters prior to crushing to maximize processing profitability.

Miners must work legally to have access to our services.

## HEAVY EQUIPMENT EXTRACTION

When Mamba works with a rich ore body, we offer to become owner and operator and increase the scale of operations if agreed by Chief and mine owners.

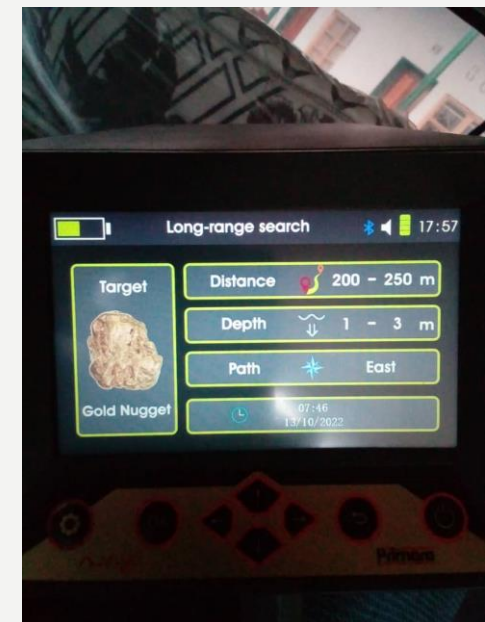

Foreign mine ownership in partnership with local mine owners is the model being promoted by Zambia.

# PROVIDING VALUE ADDITION FOR ARTISANAL MINERS

Mamba's scanning and data collection allow local miners to work productive areas. Miners no longer need to dig blindly. Gold recovery is much higher and protecting miners from mercury contamination is also a major benefit.

We will have an agreement with mine owners. With the relationships, Mamba can advance the more attractive properties to larger scale. Mamba has identified some areas with high grade gold deposits being worked over extensive areas from previous work.

# THE OPERATION

---

Mine License owner or Chief sign Contract for the Supply of Mineral Detection Services.

---

Initial scanning of prospective mine site. Begin with providing digging locations for artisanal miners and oversee the digging while scanning the ore being produced.

---

If gold grades are acceptable, Mamba will offer additional services to increase production such as jackhammers, compressors, pumps and wash plants.

---

When site displays potential scale, deliver 15 tonne per hour Mobile Processing Plants operating at mine sites manufactured in Johannesburg, South Africa region.

---

Provide excavation and transport services from mines to processing plant.

---

Possibilities exist for partnerships on projects with significant potential.

ZAMBIA IS MINERAL RICH WITH AN ABUNDANCE OF GOLD, COPPER, COBALT, EMERALDS, SILVER, LITHIUM, TIN AND OTHER MINERALS IN MANY REGIONS THROUGHOUT THE COUNTRY.

IT IS 752,618 KM<sup>2</sup> (290,587 SQ MI)

THE COPPER BELT IS IN THE NORTH WHICH IS CURRENTLY BEING MINED OPEN PIT.

LITHIUM HAS BEEN IDENTIFIED IN THE SOUTHERN PROVINCE .

GOLD, EMERALDS AND OTHER PRECIOUS METALS HAVE BEEN IDENTIFIED THROUGHOUT THE COUNTRY

ZAMBIA HAS A STABLE GOVERNMENT AND WELCOMES FOREIGN INVESTMENT.

# **FRANK BALESTRA, PRESIDENT, CEO & CHAIRMAN OF THE BOARD MAMBA GOLD CORP.**

- Mr. Balestra has been working in Africa since 2011. He has been involved in various facets of the gold industry over the past 5 years and has been active in DRC, Rwanda, Tanzania, Uganda, Kenya, Burkina Faso and Mali. Over the past 12 years he has worked with artisanal miners bringing semi-industrial processes to their mining projects. He is uniquely qualified with understanding operating in Africa, politics, logistics, has developed important relationships, as well as suppliers for equipment.
- In addition, he has over 35 years' experience in assisting and advising private and public companies; procuring funding and incubating organizations in various stages of growth. He has successfully transformed start-ups from R&D and product development to commercially successful public entities.
